HAMMER FINISH

Product Description

Quick drying hammer finish providing both decorative and protective properties to metal surfaces.

The hammered effect is ideal for uneven, dented, scratched surfaces etc. to cover all defects.

Recommended Uses

For metallic substrates; sheet-metal work, castings, machinery, office and industrial equipment where a heavy-duty finish as well as a decorative effect are required.

Application

It is recommended to prime steel surfaces before applying Hammer finish.

Thin up to %20 with thinner.

METALLIC FINISH

Product Description

A high quality self-priming paint specially designed to protect metal surfaces and provide a decorative metallic finish.

Recommended Uses

It can be applied on unpainted or previously painted surfaces that require a decorative protection.

Application

Thin up to %20 with thinner or white spirit.
Apply by brush or spray.
